Summary

Software Developer with 4+ years of experience in ServiceNow and Python automation. Worked on ITSM solutions including Incident and Change lifecycle management, Service Catalog, Flow Designer, and Business Rules to automate and improve service processes. Experienced in integrating ServiceNow with external systems using REST APIs and IntegrationHub for automated data exchange and lifecycle management. Good understanding of both server-side and client-side scripting in ServiceNow. Also developed Python-based REST APIs and automation scripts for backend integration work. Focused on building practical, reliable, and efficient solutions that support business operations.

Experience

Accenture | UP, Noida

Packaged App Development Analyst | 02/2022 - Present

ServiceNow Experience

- Analyzed business requirements and developed customized solutions on ServiceNow including Service Catalog items, Record Producers, workflows, and form customizations to streamline service request management.
- Worked on ServiceNow ITSM modules including Incident, Request, Change, and Problem Management to automate IT service processes and improve operational efficiency.
- Developed and optimized Flow Designer flows, subflows, Business Rules, Script Includes, Client Scripts, UI Policies, and Glide API-based scripting to implement business logic and process automation.
- Implemented ServiceNow IntegrationHub and REST API integrations to automate incident and change creation, status synchronization, and notifications between ServiceNow and external systems.
- Built and consumed REST web services for seamless communication between ServiceNow and external enterprise applications.
- Configured ACLs, roles, notifications, assignment rules, scheduled jobs, and approval workflows to ensure secure access control and efficient task management.
- Contributed to CMDB data management, custom reports, dashboards, and operational metrics to support accurate configuration tracking and business decision-making.
- Developed custom APIs and automation scripts using Python to support integrations and backend processing.
- Worked with Glide APIs (GlideRecord, GlideSystem, GlideAjax) for efficient server-side scripting and data manipulation within ServiceNow.
- Implemented scheduled jobs and background scripts to automate routine maintenance and data processing tasks.
- Configured and maintained custom tables, fields, and dictionary entries to support scalable ServiceNow data models.
- Contributed to CMDB data management and integrations to maintain accurate configuration item records.
- Participated in code reviews, debugging, and performance optimization to maintain high-quality development standards.

Python / Automation Experience

- Developed backend automation solutions and REST APIs using Flask and FastAPI for workflow automation, system integrations, and data processing.
- Built Python-based utilities and automation scripts for API integrations, data transformation, logging, and error handling to support operational efficiency.
- Developed chatbot and automation solutions using Microsoft Bot Framework for Microsoft Teams to improve user interaction and automate support workflows.
- Utilized GitHub for version control, branch management, pull requests, and collaborative development practices across Python automation projects.
- Assisted in AI-driven automation and prompt refinement initiatives to enhance request handling and reduce manual support effort.

Innostax Software Labs Pvt LTD | Harayana, Gurugram

Software Development Associate | 05/2021 - 09/2021

- Developed scalable web applications using JavaScript, HTML/CSS, and React.js, ensuring high performance and reliability.

- Applied best practices in coding, including architectural patterns and efficient standards.
- Conducted code reviews to uphold standards and improve quality.
- Focused on continuous improvement by optimizing workflows and incorporating feedback.

Education

Galgotias University | Greater Noida, UP
B-Tech (Computer Science and Engineering) | 07/2020

Skills

- **ServiceNow Development:** ITSM, CMDB, Business Rules, Script Includes, Client Scripts, UI Policies, UI Actions, ACLs, Catalog Items, Record Producers, Service Catalog, Flow Designer, IntegrationHub, REST APIs, Scheduled Jobs, Update Sets, Reporting & Dashboards
- **Web Development:** JavaScript, React.js, HTML/CSS, PHP (Codeigniter)
- **Programming Languages:** C, Python
- **Python Frameworks:** Flask, FastAPI
- **Bot Development:** Microsoft Bot Framework
- **Database:** MySQL
- **Tools & Practices:** GitHub, Agile Methodology, Problem-Solving, Analytical Thinking, Communication & Collaboration
